

SAP Enhancement for Electronic Chip Manufacturing Company

SAP Enhancement for Electronic Chip Manufacturing Company - Case Study

The Summary

The client is a Geneva (Switzerland) based company having offices at America, Asia, Europe, Japan, Middle East and Africa. They were using SAP ECC 5.0 with various modules. They approached AG Technologies to work on SAP CIN (Country India Version) implementation for withholding tax.

The Client

The client is one of the world's largest semiconductor companies with net revenues of US\$10.0 billion in 2007. They are the world's fifth largest semiconductor company with market leadership in many fields. According to the latest industry data, the client is the world's fifth largest semiconductor company with market leadership in many fields.

The client is the leading producer of application-specific analog chips and power conversion devices. It is also the #1 supplier of semiconductors for the Industrial market and for set-top box applications, and occupies leading positions in fields as varied as discrete devices, camera modules for mobile phones and automotive integrated circuits.

The Business Requirement

Being Geneva based organization and having IT infrastructure over there, they wanted some Indian partner to implement withholding tax, as the Indian tax is very vast and complicated to understand.

The client took a conscious decision for enhancement of its SAP processes through leveraging upon Information Technology, with increased control, streamlined processes, cost savings, knowledge management, information dissemination and for this they approached AG Technologies

Project Summary

Industry: Electronic Chip Manufacturer

Client Profile:

The client is one of the world's largest semiconductor companies with net revenues of US\$10.0 billion in 2007.

Business Requirement:

The client wanted SAP CIN implementation for withholding tax

Solution Benefit:

- Business processes enhancement
- Enhanced productivity through standard formats
- Enhanced service levels
- Increased operational efficiencies

The Solution

AG Technologies leverages its proven onsite-offshore capability to ensure focus on quality, flexibility and cost-efficiency. The client uses 3 company codes for its various locations. Country India Version (CIN) was implemented and SAP Notes Analysis was performed

Some highlights of its solution are

- Applied relevant SAP Notes for generating TDS vendor Report
- Prepared the Business Blueprint for all the business processes
- Sending Reports to the Govt. dept has become a click-and-mail affair compared to the long working hours put in by the Accounts of the company by using standard formats

Technology and Tools:

- **SAP Solution:** SAP R/3 ECC 5.0
- **Operating System:** Windows Server 2007
- **Database:** HP

The Solution Benefit

- Enhanced productivity through standard formats
- Business-processes enhancement
- Seamless integration with other systems
- Reduced 20 - 30% in total cost of operations through self-service
- Reduced paperwork
- Enhanced service levels
- Increased operational efficiencies
